

### Policy of the Clay Peak Landfill

The County desires to facilitate the recycling of as much of the metals waste stream as is practical. Clay Peak Landfill has an established fee schedule (see Appendix D) for acceptance of white goods. The white goods will be temporarily held on-site pending sale to a qualified metal recycler.

## **\* 7. INDUSTRIAL WASTES**

ISWFA defines industrial solid waste as "solid waste generated by manufacturing or industrial processes that is not a hazardous waste regulated under subtitle C of RCRA. Such waste may include, but is not limited to, waste resulting from the following manufacturing processes: Electric power generation; fertilizer and agricultural chemicals; food and related products and by-products; inorganic chemicals; iron and steel manufacturing; leather and leather products; nonferrous metals manufacturing/foundries; organic chemicals; plastics and resins manufacturing; pulp and paper industry; rubber and miscellaneous plastic products; stone, glass, clay and concrete products; textile manufacturing; transportation equipment and water treatment. This term does not include mining waste or oil and gas waste."

### Policy of the Clay Peak Landfill

Industrial wastes that may be considered as normal municipal solid waste are those wastes that may be landfilled without any special procedures, handling, or testing by landfill personnel. Each industrial waste and/or waste stream, which does not meet the above criteria, may be evaluated individually to determine if the waste will be accepted. The burden of proof that a particular industrial waste and/or waste stream is an acceptable innocuous waste is solely the responsibility of the waste generator. Any industrial wastes, which fit the above criteria, will not automatically be accepted at the landfill. The Payette County Board of Commissioners reserve all rights to either accept or reject any industrial waste and/or waste stream regardless of data supplied by the waste generator.

The County encourages industrial waste generators to evaluate their waste stream(s) to minimize, detoxify, and recycle as much of the waste stream as possible.

## **\* 8. ASBESTOS**

Disposal of Asbestos containing materials is regulated by criteria in EPA Title 40 CFR Part 61 National Emission Standards for Hazardous Air Pollutants: Asbestos NESHAP Revision. §61.154 prescribes the asbestos handling requirements for active waste disposal sites. Ninety days prior to the acceptance of asbestos-containing material at a new source, the County must submit a new source report to the U.S. EPA Asbestos Program Coordinator describing the management methods, which will be employed to handle the disposal of the waste.

### Policy of the Clay Peak Landfill

Clay Peak Landfill shall comply with all disposal criteria as required by §61.154. Clay Peak Landfill will only accept those asbestos containing material which are delivered to the site in conformance with handling, labeling, packaging and all other criteria as required for waste generators and transporters of EPA Title 40 CFR Part 61.

The County will submit a new source report in compliance with criteria in §61.10 and §61.153 ninety days prior to acceptance of asbestos-containing material for disposal at a new source.

### Special Handling Procedure

The following procedure details the extra management criteria mandated by §61.154 to which the County must comply.

1. At least six inches of compacted non-asbestos-containing material will be placed over the asbestos-containing waste material during the same operating day or within twenty-four hours of disposal. If the asbestos-containing wastes are not buried within 24 hours Clay Peak Landfill will erect warning signs at all entrances and at intervals of 330 ft or less along the property line of the site or along the perimeter of the sections of the site where asbestos-containing waste material is deposited.
2. Maintain a waste shipment record (WSR) like the form shown in this chapter. The landfill operator must evaluate incoming waste WSR manifests for accuracy and sign for receipt of material. A copy of the WSR manifest must be returned to the waste generator within 30 day of receipt of the waste.
3. The County will submit, to SWDH, DEQ, and the Regional EPA, a discrepancy report if any incongruities are discovered with the WSR regarding waste quantities or condition of the waste. The report will be submitted within 15 days for waste volume discrepancies and 1 day for improperly enclosed or uncovered waste.
4. All copies of WSR's will be retained for at least two years and will be available for inspection by regulatory agencies at the site during normal business hours.
5. All the records and maps of the location, depth, area, and quantity in cubic yards of asbestos-containing waste material at the site will be maintained until closure of the landfill. These records will be available for inspection by regulatory agencies at the site during normal business hours.
6. All applicable regulatory agencies will be notified at least 45 days prior to excavating or otherwise disturbing any asbestos-containing waste material that has been previously covered. Notification shall include scheduled starting and completion dates, reason for disturbing the waste, procedures to be used to control emissions during excavation, storage, transport, and final disposal.
7. A copy of all the records of asbestos waste disposal location and quantities will be submitted to the regulatory agencies upon closure of the landfill.
8. Within 60 days of landfill closure, a property deed of the landfill will be filed which contains: statements that land was used for asbestos disposal, statement that all records of asbestos waste disposal locations and quantities were properly filed, and that the site is subject to EPA Title 40 CFR 61 subpart M (§61.140 through §61.157).

## WASTE SHIPMENT RECORD (ASBESTOS)

1. Work site name & address	Owner name	Owner phone
2. Operator name & address		Operator phone
3. Waste Disposal Site (WDS) name, address and physical site location		WDS phone
4. Name and address of responsible agency		
5. Description of materials	6. Containers No.    Type	7. Total quantity m3    (yd3)
8. Special handling instructions and additional information		
9. OPERATOR'S CERTIFICATION: I hereby declare that the contents of the consignment are fully and accurately described above by proper shipping name and are classified, packed, marked, and labeled, and are in all respects in proper condition for transport by highway according to applicable international and government regulation.		
Printed/typed name & title	Signature	Month   Day   Year
10. Transporter 1 (Acknowledgement of receipt of materials)		
Printed/typed name & title	Signature	Month   Day   Year
Mailing address		Phone
11. Transporter 2 (Acknowledgement of receipt of materials)		
Printed/typed name & title	Signature	Month   Day   Year
Mailing address		Phone
12. Discrepancy indication space.		
13. Waste disposal site owner operator: Certification of receipt of asbestos materials covered by this manifest except as noted in 12.		
Printed/typed name & title	Signature	Month   Day   Year

## WASTE SHIPMENT RECORD INSTRUCTIONS:

### Waste Generator Section (Items 1-9)

1. Enter the name of the facility at which asbestos waste is generated and the address where the facility is located. In the appropriate spaces, also enter the name of the owner of the facility and the owner's phone number.
2. If a demolition or renovation, enter the name and address of the company and authorized agent responsible for performing the asbestos removal. In the appropriate spaces, also enter the phone number of the operator.
3. Enter the name, address, and physical site location of the waste disposal site (WSD) that will be receiving the asbestos materials. In the appropriate spaces, also enter the phone number of the WDS. Enter "on-site" if the waste will be disposed of on the generator's property.
4. Provide the name and address of the local, State, or EPA Regional office responsible for administering the asbestos NESHAP program.
5. Indicate the types of asbestos waste materials generated. If from a demolition or renovation, indicate the amount of asbestos that is:
  - Friable asbestos material
  - Nonfriable asbestos material
6. Enter the number of containers used to transport the asbestos materials listed in Item 5. Also enter one of the following container codes used in transporting each type of asbestos material (specify any other type of container used if not listed below):
  - DM – Metal drums, barrels
  - DP – Plastic drums, barrels
  - BA – 6 mil plastic bags or wrapping
7. Enter the quantities of each type of asbestos material removed in units of cubic meters or cubic yards.
8. Use this space to indicate special transportation, treatment, storage or disposal or Bill of Lading information. If an alternate waste disposal site is designated, note it here. Emergency response telephone numbers or similar information may be included here.
9. The authorized agent of the waste generator must read and then sign and date this certification. The date is the date of receipt by transporter.

NOTE: The waste generator must retain a copy of this form.

### Transporter Section (Items 10 & 11)

10. & 11. Enter name, address, and telephone number of each transporter used, if applicable. Print or type the full name and title of the person accepting responsibility and acknowledging receipt of materials as listed on this waste shipment record for transport. Enter date of receipt and signature.

NOTE: The transporter must retain a copy of this form.

### Disposal Site Section (Items 12 & 13)

12. The authorized representative of the WDS must note in this space any discrepancy between waste described on this manifest and waste actually received as well as any improperly enclosed or contained waste. Any rejected materials should be listed and destination of those materials provided. A site that converts asbestos-containing waste material to nonasbestos materials is considered a WDS.
13. The signature (by hand) of the authorized WDS agent indicates acceptance and agreement with statements on this manifest except as noted in Item 12. The date is the date of signature and receipt of shipment.

NOTE: The WDS must retain a completed copy of this form. The WDS must also send a completed copy to the operator listed in Item 2.
